

You can import vulnerability findings from CSV to Cyver Core. Use the following template to format your CSV.
Or, download a sample CSV file from the finding importer in the portal.

Field	Values
Code	<i>default:</i> auto-generated
Title (Required field)	
Type	Vulnerability Observation
Assets	10.211.55.3
Description	
Occurrence	New Occurrence Reoccurrence
Labels

IMPORTANT NOTES & LIMITATIONS

- The maximum number of findings that can be imported in a single upload is 5,000 findings.
- If your file exceeds this limit, the import may fail depending on the selected import options (e.g., aggregation settings or filtering by severity).
