

ACTIVATION IN PENTESTER PORTAL:

1. Go to Clients
2. Select the client and click on *Client Portal* tab
3. *Finding Retest* setting is enabled by default when creating a new client. When disabled, the client users can not request findings to be retested:

4. To make it possible for client users to request findings to be retested, it is needed to enable the toggle and to change notification settings by clicking on [Change notification settings](#) button (*Send to all Pentester users in Project Team* is checked by default):

CLIENT PORTAL:

1. After allowing client users to request retest, the [Request Retest](#) button is displayed in a Finding details:

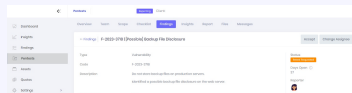

2. When the client user clicks on the **Request Retest** button he confirms the action by submitting also a message:

CLIENT PORTAL & PENTESTER PORTAL:

- Once the action is confirmed, the status of that Finding changes to **Retest Requested** in both Client Portal and Pentester Portal:

- The changing of the status and the message above of the client user is saved in the *Activity* section of the Finding;

- The client account manager (*if any*) and the pentesters of that project team (*if notification checked in the settings*) are notified by email and in the portal for that request (*make sure the notifications of your user are activated*).
