

1- You can do a full project copy by going to a client, then use the Import Project action from the Actions menu.

2- Then you select the Origin project:

3- the project will be fully copied to the Destination client.

The following project data is copied:

- Name
- Project Template
- All Project Settings
- Custom fields
- Labels
- Assets in scope
- Methodology
- Tasks (become unassigned)
- Findings and evidence (become unassigned, no finding events)
- File
- Report (all versions)
- Workflow tasks
- Quotes

The following is NOT copied:

- Code (new code is generated)
- Client assignment
- Teams and users
- Messages
- Planning dates

Note: Findings will get a new auto-generated code
