

In addition to generating PDF reports, Cyver Core also allows you to export reports in Word format. Here's how to do it:

1. ACTIVATE GENERATE WORD TO THE REPORT TEMPLATE

Go to the Report Template and click on Edit. On the *General Settings* tab you will find *Generate Word* under *Generate Extra Files*. Check the checkbox:

Edit Report Template: Demo Report (v1)

Template General Settings PDF settings Word Settings Customize Text

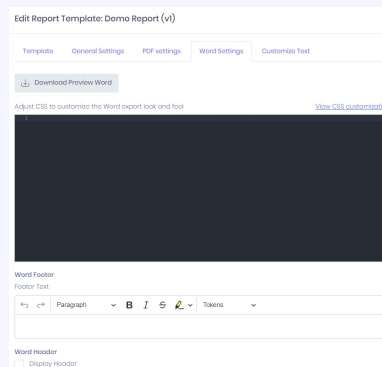

Generate Extra Files

☒ Generate Word

☐ Generate HTML

2. ADJUST CSS TO CUSTOMIZE THE WORD EXPORT LOOK AND FEEL

To style the report in Word, go to the *Word Settings* tab and use CSS to customize the report's look and feel as you already do to the PDF version. There you can also add footer text and/or header text:

Edit Report Template: Demo Report (v1)

Template General Settings PDF settings Word Settings Customize Text

Download Preview Word

Adjust CSS to customize the Word export look and feel [View CSS customization](#)

Word Footer

Footer Text

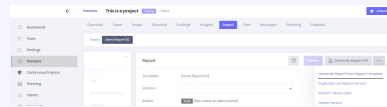

Paragraph B I S L Tokens

Word Header

☐ Display Header

3. SAVE THE CHANGES

4. OPEN THE PROJECT'S REPORT AND GENERATE IT FROM THE REPORT TEMPLATE

5. GENERATE REPORT PDF AND EXPORT REPORT TO WORD

Once the report PDF is generated,
click on the three dots and click on
the **Export Report to Word** to have
to download it in your PC:
