

You can request to have a full custom domain to access your portal, for example, **portal.yourdomain.com**

Your base domain will remain **tenantname.cyver.io**

## REQUEST PROCESS

Our team will send the the DNS configurations (CNAME and TXT records) for your specific data center and domain so we can setup a dedicated SSL Certificate for you.

## CAA RECORD AUTHORITY

If you have CAA records configure, you need to include **godaddy.com** as issuer.
