

Client fields allow you to categorize clients based on unique properties like Client Number, Name, Default Pentest Team, Client Status, etc.

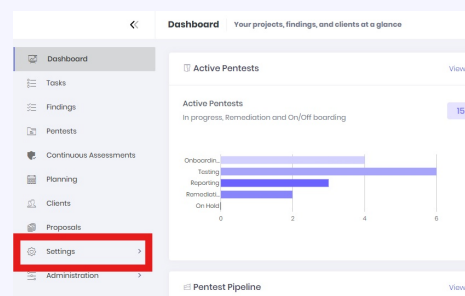

These fields are visible on the client page, can be used for sorting clients, show up as a column and search filter in the client list, and can be used to sort, search, and assign clients.

With Custom Client Fields, you can easily create your own custom fields. This means you can add unique filters, unique column views, or sort clients based on details like pentest type, region, scanners used, or any other details you want.

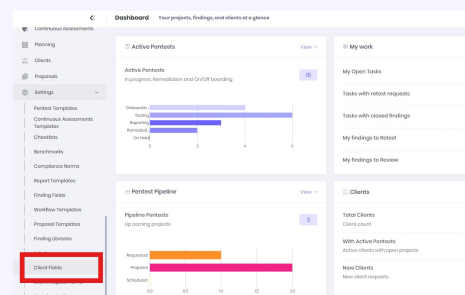

Let's take a look at how to set custom fields up yourself:

HOW TO CREATE CUSTOM CLIENT FIELDS

1. From your Cyver Core Dashboard, click **Settings**

2. Go to **Client Fields**

3. Select **Manage Custom Fields**

Client Fields

Field Name	Field Type	Visibility	Is Visible
Region	Text	Visible	Yes
Service Level	Dropdown	Visible	Yes
Field Name	Dropdown	Visible	Yes
New Custom Field	Multiselect	Visible	Yes

Showing 1 of 4 custom fields. Status: All Active

4. From the menu, click **+ New Custom Field**

Manage Client Custom Fields

+ New Custom Field

All Visible On

- Region On
- Service Level On
- Field Name On
- New Custom Field On

Cancel Save

5. First, add a **display name** for your Custom Client Field. This should be easy to remember and searchable. It will show up in your column view and as a Client property.

Multiselect4

Multiselect5

- Text Field (Ideal for short text fields)

Text

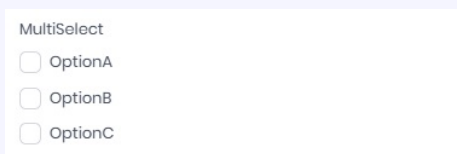

- Multitext (ideal for larger and formatted text fields)

- Dropdown (Select one of a pre-defined selection of choices)

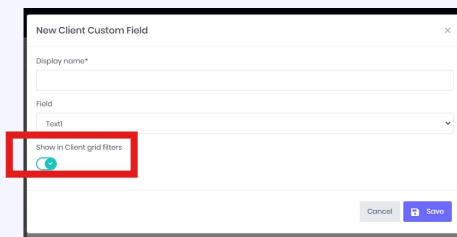

- Multiselect (Select one or more of a pre-defined selection of choices)

You can have up to five of each custom field

6. Then select if your new custom field should show up in the **client grid filters**. You can always change this later.

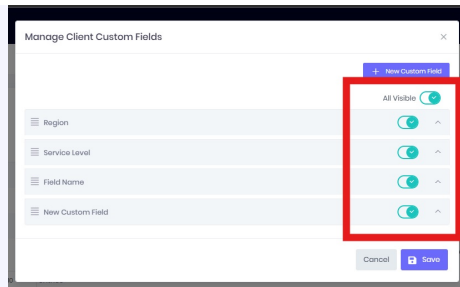

7. Finally, **save** your selection.

Your new Custom Client Field is ready to use!

TROUBLESHOOTING:

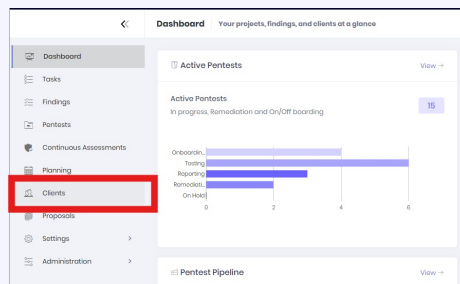

Is your new field not showing up from the client page? Check back in Manage Client Fields to make sure the field is set to Visible. Or, use the Master Toggle to force all fields to visible. Don't forget to hit Save to apply your settings.

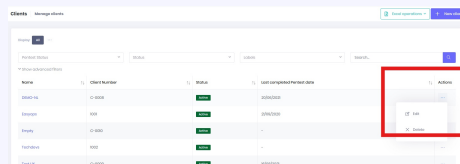

USING CUSTOM CLIENT FIELDS

Once your Custom Client Fields are in place, you can start using them to categorize, sort, and filter your clients.

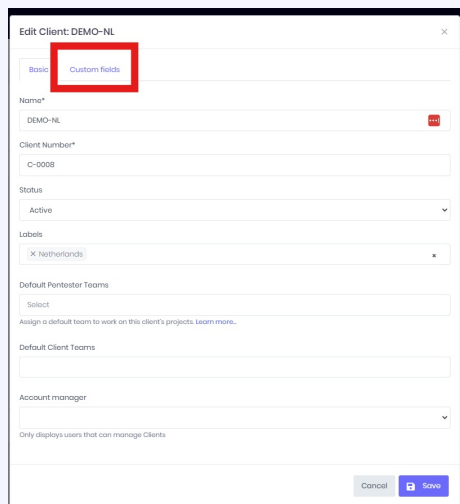

1. Go to the **Clients** tab on the menu

2. Select the Client you'd like to modify
3. From the overview page, click **Actions** and select **Edit**

4. Click **Custom Fields**

5. Select your chosen **Custom Fields** for

this client and click **Save**

The screenshot shows the 'Edit Client: DEMO-NL' form. The 'Custom fields' tab is active. A red rectangular box highlights the following sections: 'Region' (text input), 'Service Level' (dropdown menu showing 'Large Customer'), 'Field Name' (text input), 'Option B' (dropdown menu), and 'New Custom Field' (which includes a rich text editor with a toolbar and the text 'This is the custom field'). At the bottom right, there are 'Cancel' and 'Save' buttons.

ADJUSTING GRID VIEW WITH CUSTOM CLIENT FIELDS

Once you've applied a Custom Client Field to a client, you can use that to sort the grid view.

1. Go to the **Client** tab from the menu:
2. Click **Show Advance Filters**

The screenshot shows the 'Clients' management page. At the top, there's a 'Clients' header with a 'Show Advanced Filters' button. Below this, there's a search bar and a table of clients. A red rectangular box highlights the 'Show Advanced Filters' button.

3. Select the **Custom Field** of your choice to immediately adjust the view.

The screenshot shows the 'Clients' management page with the 'Show Advanced Filters' dropdown menu open. A red rectangular box highlights the dropdown menu, which lists various filters including 'Region', 'Service Level', 'Field Name', and 'Option B'. The table below the dropdown shows client data with columns for Name, Client Number, Service Level, and Date.

That's it! If you have any more questions about Custom Client Fields, reach out, we'll be happy to help!
