

Timesheets allow you to track time spent, per pentester, per project or pentest, across your organization. This can be used to track hours per project for internal or external reasons, and generates a timesheet of hours per project, per status that you log.

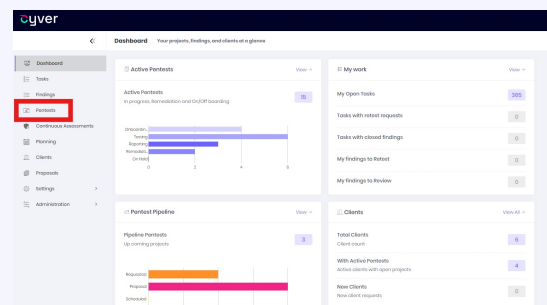

Timesheets are a great way to invoice extra work, to add consultancy, to track time spent per project/phase for internal purposes, and much more.

You can add time to projects from the project.

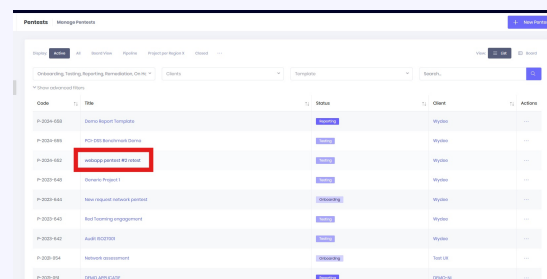

ADD TIME TO TIMESHEETS

Pentesters can add time to their own timesheet from the Project. Managers can also add time for any timesheet.

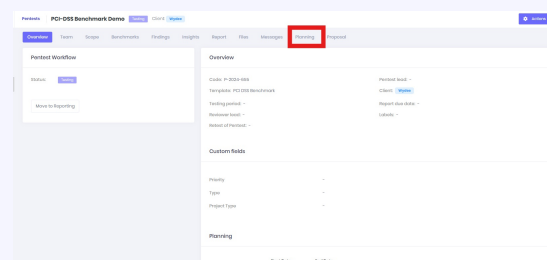

1. Click **Pentests** from the Menu

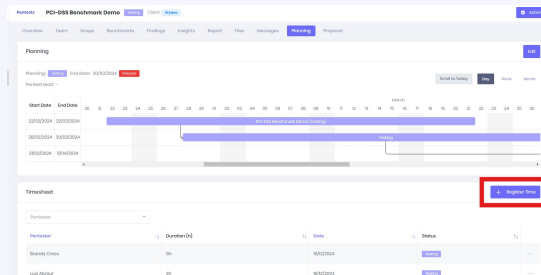

2. Select the Pentest you'd like to add time for

3. Click **Planning** in the Pentest Menu

4. Click + Register Time

5. Add hours and details. Hours are saved per project status.

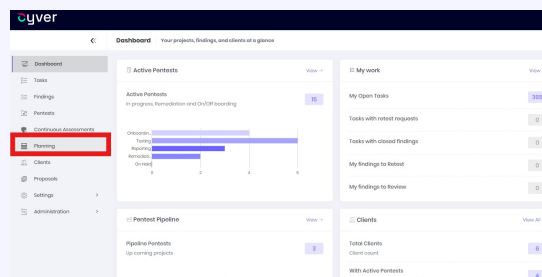

The screenshot shows the 'New timesheet record' form. It includes fields for 'Pentester*' (Luis Abreul), 'Status*' (Testing), 'Duration (h)*', 'Date*' (10/12/2024), and a 'Note' field. At the bottom, there are 'Cancel' and 'Save' buttons.

6. Save

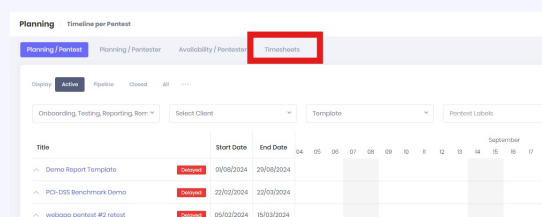

MANAGE TIME FROM THE PLANNING DASHBOARD

You can

1. Go to Planning from the Menu

2. Click Timesheets from the Planning Menu

3. View timesheets and adjust views using filters

Planning Timesheet reports

Planning/Forecast Planning/Forecast Availability/Forecast **Timesheets**

Timesheets report: To register time go to the Planning tab in the project

Status: Period: Year: Month:

Resource	Resource	Duration(h)	Date	Status
PO-100 Development Demo	Development	2h	10/02/2024	Details
PO-100 Development Demo	QA	2h	10/02/2024	Details
webapp frontend #02	QA	2h	10/02/2024	Details
webapp frontend #02	QA	2h	10/02/2024	Details
Total		8h
