

You can batch import pentest users from an Excel file.

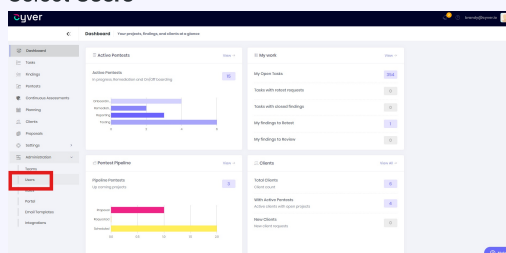

To do so, prepare an Excel file with the users you'd like to update. You can use the sample file from your Cyver Core website, found under the Users tab, and at Excel Operations.

HOW TO IMPORT USERS FROM AN EXCEL FILE

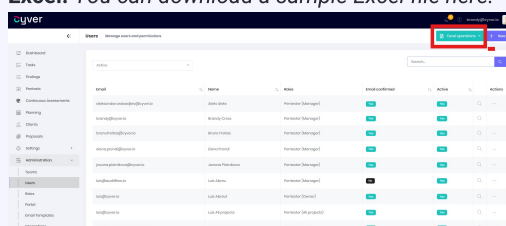

1. Click **Administration** in the Navigation Menu

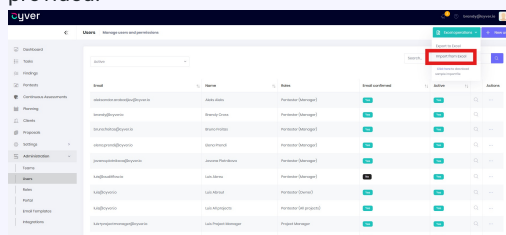

2. Select **Users**

3. Click **Excel Operations** and choose **Import from Excel**. You can download a sample Excel file [here](#).

4. Select your file. The file will import in the background while you continue to use the platform. Once completed, new users will receive an account activation email to the address provided.

HOW TO FORMAT AN EXCEL

FILE FOR IMPORTING USERS TO CYVER CORE

You can upload users from any Excel file, providing it has the correct columns and data.

That should look like:

Field	Required?	Values
Name	Yes	
Surname	Yes	
Email	Yes	
Roles	Yes	Pentester (All Projects) Pentester (Client Access) Pentester (Manager) Pentester (Project only) Pentester (Project view-only) Project Manager Team Manager
Custom Display Name	No	
Function	No	
Phone number	No	

You can download a sample import file from the Excel operations button, detailed in the previous step.
