

If you want to rapidly onboard a larger number of clients at once, you can do so with a simple Excel import. To do so, simply make sure your file is formatted correctly with fields supported by Cyver Core. Then, import your client list from the Clients tab.

IMPORT CLIENTS FROM EXCEL

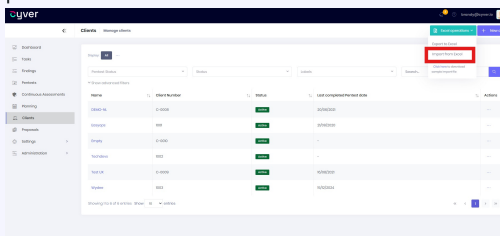

1. Click **Clients** in the Navigation Menu

2. Click **Excel Operations** and Select **Import from Excel**. You can download a sample Excel file for formatting [here](#).

3. Select your File. The file will upload in the background while you continue to use the platform.

HOW TO FORMAT EXCEL FOR IMPORTING CLIENTS

Download a sample Excel file from the Excel Operations tab, according to Step 2 listed above.
