

Cyver Core supports direct imports from Prowler via JSON. Simply export your files to JSON and import them directly, to save all details. This includes data from Prowler's 500+ checks across AWS , GCP, and Azure clouds.

You can manually import findings and reports directly to Cyver Core. You can also automatically import Prowler results via the API.

IMPORTANT NOTES & LIMITATIONS

- The maximum number of findings that can be imported in a single upload is 5,000 findings.

- If your file exceeds this limit, the import may fail depending on the selected import options (e.g., aggregation settings or filtering by severity).
