

This guide explains how to use the finding chart token in reports using a query string-like syntax.

BASIC STRUCTURE

The token uses URL-style parameters separated by `&` characters. For example:

```
{Finding_Chart?
type=pie&dimension=severity&setting.sort.direction=ascending&
setting.filter.type=Vulnerability}
```

This will be replace by a **pie chart** of Findings (Vulnerabilities only) by severity.

CONFIGURATION SECTIONS

1. REQUIRED PARAMETERS

These are the required parameters and their options:

```
type=[bar,pie]&
dimension=[status,severity,vulnerability_type,label]&
display=[count,percentage]&
```

Important Note for Labels: When setting `dimension=label`, you **must** also include the `setting.filter.labels=<labels>`

2. SIZE

You can configure the size by adding the size configuration:

```
setting.size.width=900(default)&
setting.size.height=220(default)&
```

3.FILTERING AND SORTING (OPTIONAL)

Filter findings by various criteria:

```
setting.filter.type=Vulnerability&
setting.filter.status=ReadyRetest,PendingFix&
setting.filter.severity=Critical,High&
setting.filter.labels=Security,PCI-DSS&
setting.sort.direction=Ascending&
```

HTML STRUCTURE AND CSS CLASSES

The Finding Chart token generates a chart with configurable dimensions.

ROOT CONTAINER

```
<div class="finding-chart-container">
```

Purpose: Top-level container for all the chart content

CSS Classes:

- `finding-chart-container`: Base wrapper class

EXAMPLES

Here's an example combining multiple settings:

PIE CHART WITH VULNERABILITIES BY SEVERITY, FILTERED BY LABEL

```
{Finding_Chart?type=pie&dimension=severity&
setting.sort.direction=ascending&
setting.filter.type=Vulnerability&setting.filter.labels=<labels>}
```

BAR CHART WITH VULNERABILITIES BY SEVERITY, FILTERED BY LABEL

```
{Finding_Chart?type=bar&dimension=severity&
setting.sort.direction=ascending&setting.filter.type=Vulnerability&
setting.filter.labels=<labels>}
```

PIE CHART WITH VULNERABILITY TYPES BY SEVERITY

```
{Finding_Chart?type=pie&dimension=vulnerability_type&
display=count&setting.sort.direction=ascending&
setting.filter.type=Vulnerability}
```

PIE CHART WITH FINDINGS, FILTERED BY LABELS

```
{Finding_Chart?type=pie&dimension=label&
display=count&setting.sort.direction=descending&
setting.filter.type=Vulnerability&setting.filter.labels=<labels>}
```
