

Cyber Core offers an XML importer for **HCL AppScan** vulnerability scanning results. To use it, simply export your AppScan findings as an XML file and import them directly into Cyber Core from the **Import Findings** tab. The importer is compatible with standard output generated by HCL AppScan.

Cyber Core also supports automated imports via API, making it easy to integrate AppScan findings into your security workflow across multiple projects.

FINDINGS FIELD MAPPING

IMPORTANT NOTES & LIMITATIONS

- The maximum number of findings that can be imported in a single upload is 5,000 findings.
- If your file exceeds this limit, the import may fail depending on the

selected import options (e.g., aggregation settings or filtering by severity).
