

Cyver core supports the OWASP Top 10 Checklist, providing full coverage for the most current 2025 version (and previous 2021 and 2017 editions). This standard is designed to help organizations understand and mitigate the most significant security risks facing modern web applications.

In today's complex digital environment, where applications form the backbone of business operations, understanding and mitigating these critical risks is essential for continuous innovation and security.

WHAT IS OWASP TOP 10?

The OWASP Top 10 is a standard awareness document for developers and web application security professionals. It represents a broad consensus about the most critical security risks to web applications. The list is compiled using extensive data from security firms and organizations worldwide, highlighting the current threat landscape.

OWASP TOP 10 - 2025 EDITION
