

Once a project has been created using a Workflow Template, you can manage and adjust workflow tasks directly from the Project View.

This includes:

- Editing workflow tasks
- Adding new workflow tasks
- Resetting workflow steps

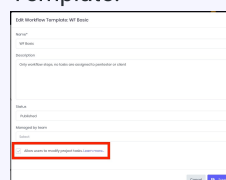

These actions allow operational flexibility without modifying the original Workflow Template.

## EDITING WORKFLOW TASKS FROM THE PROJECT VIEW

You may need to make adjustments to reflect operational changes or correct assignments.

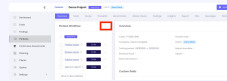

To edit a workflow task:

1. Ensure "**Allow users to modify project tasks**" is enabled in the Workflow Template.

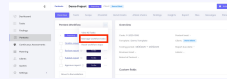

The screenshot shows a 'Edit Workflow Template' dialog box with various fields. A red box highlights the checkbox labeled 'Allow users to modify project tasks', which is currently checked.

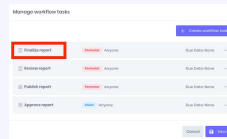

2. In the Project view, click the three dots next to **Pentest Workflow**.

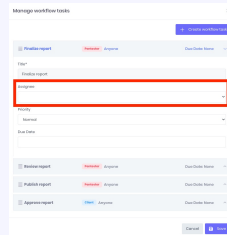

3. Select **Manage workflow tasks**.

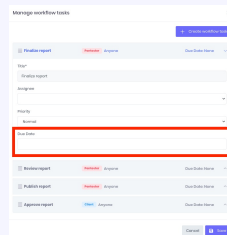

4. Click the Workflow Task you want to edit.

5. Update the Assignee if needed.

6. Modify the Due Date if required.

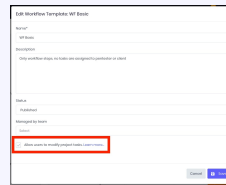

7. Save your changes.

## ADDING WORKFLOW TASKS FROM THE PROJECT VIEW

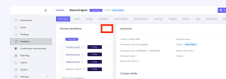

To create a new task directly in a project:

1. Ensure "**Allow users to modify project tasks**" is enabled.

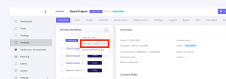

The screenshot shows a form titled "Add Workflow Template: WP Editor". It has fields for "Name", "Description", "Role", "Assignee", and "Due Date". A red box highlights the checkbox labeled "Allow users to modify project tasks" which is currently checked.

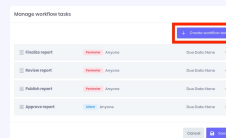

2. In the Project view, click the three dots next to **Pentest Workflow**.

3. Select **Manage workflow tasks**.

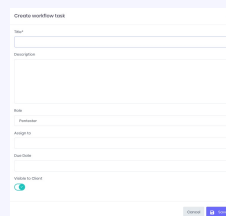

4. Click **+ Create workflow task**.

The screenshot shows a table titled "Manage workflow tasks". It has columns for "Task Name", "Status", "Assignee", and "Due Date". A red box highlights the "+ Create workflow task" button in the top right corner.

5. Fill in the task details.

The screenshot shows a form titled "Create workflow task". It has fields for "Name", "Description", "Role", "Assignee", "Due Date", and "Visibility".

- Task Name
- Task Description
- Role (Client or Pentester)
- Assign to a specific user
- Set Due Date
- Set Client Visibility

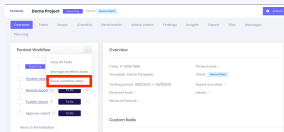

6. Click **Save**.

RESET

# WORKFLOW STEPS

The **Reset Workflow Steps** option allows you to reinitialize the workflow of an existing project.

This action re-applies the workflow configuration based on the original Workflow Template linked to the project.

## WHAT HAPPENS WHEN YOU RESET WORKFLOW STEPS?

When triggered, the system will:

- Re-assign all workflow tasks according to the role assignments defined in the Workflow Template
- Recalculate all task due dates based on the template's deadline settings
- Reset all workflow task statuses to their initial state

In other words, the project's workflow is returned to its starting structure as defined by the template.

## WHEN SHOULD YOU USE THIS OPTION?

Reset workflow steps can be useful in scenarios

such as:

- Restoring task assignments according to template defaults
- Recalculating due dates
- Correcting unintended workflow progress
- Restarting workflow execution when necessary

## IMPORTANT NOTE

Resetting workflow steps will overwrite task-level progress, including completed statuses, manual assignment changes, and due date adjustments.

This action cannot be undone. Please ensure it is used intentionally.

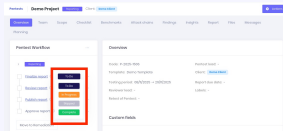

## MANAGING WORKFLOW TASK STATUSES

Workflow tasks support individual tracking statuses, independent of the overall project status. This allows assignees to accurately reflect their current progress. When editing a workflow task, you can set its status to:

- **To Do** (Default)
- **In Progress**
- **Skipped**

- **Completed**

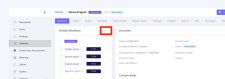

*Note: A task's status will also automatically change to "Completed" if a user manually marks it as completed or stops the time tracker for that activity.*

## VIEWING ALL WORKFLOW TASKS (FULL VIEW)

As a manager, you can view all planning tasks for a pentest in a single, consolidated view to easily track workloads and timelines.

1. In the Project view, click the three dots next to **Pentest Workflow**.

2. Select **View All Tasks**.

This opens the "Pentest Workflow All Tasks" modal, displaying a comprehensive grid of all tasks grouped by status, including the Assignee, Task Status, Due Date,

Completed By, and  
Completed At  
information.

| Name          | Type | Status      | Completed By  | Completed At     |
|---------------|------|-------------|---------------|------------------|
| John Doe      | Task | Completed   | John Doe      | 2023-10-26 10:00 |
| Jane Smith    | Task | In Progress | Jane Smith    | 2023-10-26 10:00 |
| Bob Johnson   | Task | Pending     | Bob Johnson   | 2023-10-26 10:00 |
| Alice Brown   | Task | Completed   | Alice Brown   | 2023-10-26 10:00 |
| Charlie Davis | Task | In Progress | Charlie Davis | 2023-10-26 10:00 |
| Eve Wilson    | Task | Pending     | Eve Wilson    | 2023-10-26 10:00 |
| Frank Miller  | Task | Completed   | Frank Miller  | 2023-10-26 10:00 |
| Grace Lee     | Task | In Progress | Grace Lee     | 2023-10-26 10:00 |
| Henry King    | Task | Pending     | Henry King    | 2023-10-26 10:00 |
| Ivy White     | Task | Completed   | Ivy White     | 2023-10-26 10:00 |
