

Integrate Cyver Core with ServiceNow to easily push findings as tickets directly into your ServiceNow instance. This integration features a one-way sync (Cyver to ServiceNow), making it simple for the clients to track and remediate vulnerabilities using their existing workflows.

PENTESTER PORTAL - ALLOW THE CLIENT TO CONNECT SERVICENOW

Before a client can use the integration, it must be enabled for their account from the Pentester Portal.

1. Navigate to **Clients** from the left-hand menu.
2. Select the relevant client from your list.
3. Go to the **Client Portal** tab.
4. Enable the **ServiceNow** toggle.

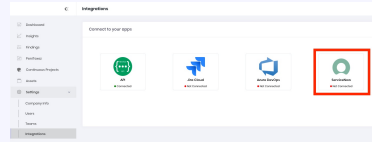

CLIENT PORTAL - LINK CYVER CORE TO YOUR SERVICENOW ACCOUNT

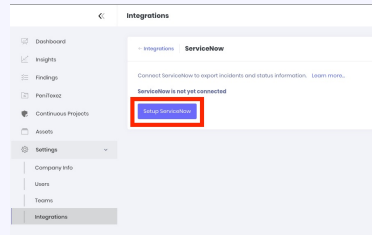

Once enabled by the pentester team, client users can set up the integration

from their portal.

1. Go to **Settings** from the left-hand menu.
2. Click **Integrations**.
3. Select **ServiceNow**.

4. Click **Setup ServiceNow**.

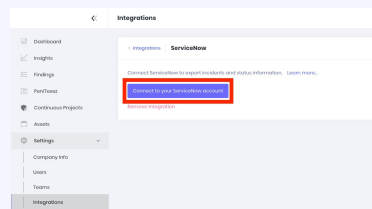

5. In the configuration modal, enter your ServiceNow credentials:

- **Instance name**
- **Client ID**
- **Client Secret**

A screenshot of a configuration modal for ServiceNow. The modal has a title bar 'ServiceNow' with a close button. It contains three input fields: 'Instance name' (with a placeholder 'MyInstanceName'), 'Client ID*', and 'Client Secret*'. Below the 'Instance name' field, there is a small text link: 'Subdomain before service-now.com? Learn more.' At the bottom right of the modal are 'Cancel' and 'Save' buttons.

6. Click **Save**.
7. Click the **Connect to your ServiceNow account** button to finalize the authorization.

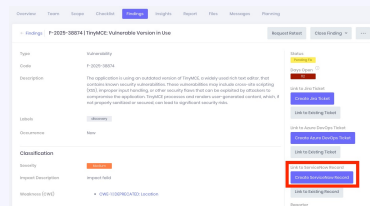

Note: You can disconnect your account at any time by returning to this menu and clicking "Remove Integration".

HOW TO CREATE AND LINK RECORDS

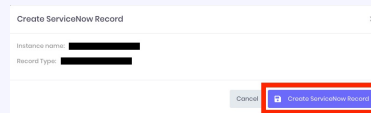

Once connected, client users can manually push findings to ServiceNow or link them to existing records directly from the Finding view within the projects.

CREATE A NEW SERVICENOW RECORD

1. Open a **Finding**.
2. On the right-hand side panel, under the "Link to ServiceNow Record" section, click **Create ServiceNow Record**.

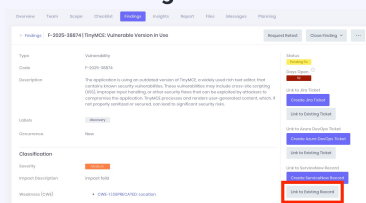

3. A modal will appear displaying your Instance name and the Record Type.
4. Click **Create ServiceNow Record** to push the finding.

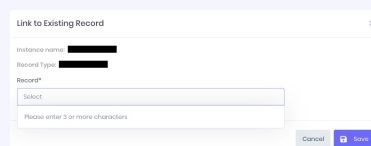

LINK TO AN EXISTING SERVICENOW RECORD

1. Open a **Finding**.
2. On the right-hand side panel, click **Link to Existing Record**.

3. In the Record search box, type at least 3 characters to search for the relevant issue in your ServiceNow instance.

4. Select the correct record from the dropdown menu and click **Save**.

Remove a Linked Record If you accidentally linked the wrong record or need to disconnect it for any reason, open the Finding and click **Remove ServiceNow Link** on the right-hand panel.
