

Clients can be managed from the Cyver Core dashboard and from the “Clients” tab on the left-hand menu.

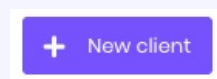

ONBOARDING CLIENTS

Cyver Core offers a full Client portal, which will display your branding as uploaded in the first step of this tutorial. Clients can interact with your organization, communicate with Pentester Users, and request pentests.

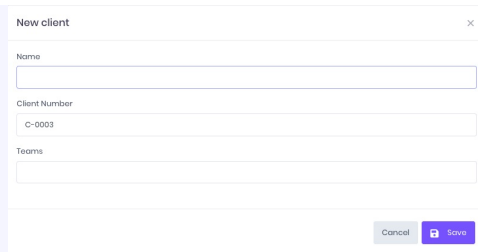

1. Click “Clients” in the left-hand menu

2. Click “+ New Client”

3. Add Client Name and Client Number.
Client Number can be from your existing invoicing or other client management system

A form titled "New client" with a close button (X) in the top right corner. It contains three input fields: "Name", "Client Number" (with the value "C-0003" pre-filled), and "Teams". At the bottom right, there are two buttons: "Cancel" and "Save" (with a save icon).

4. Click the Client Name you've just added from the list.

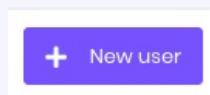

Client	000001		
--------	--------	--	--

5. Click "Users" in the Client Tab

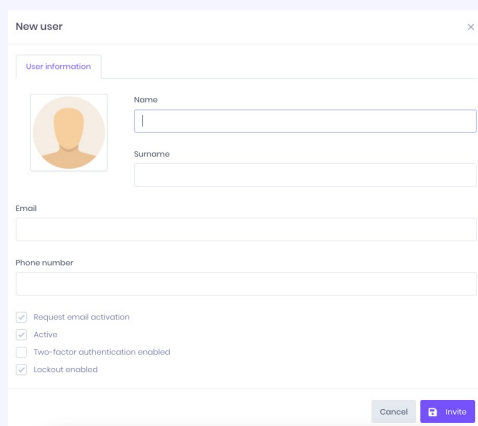

A horizontal tab bar with five tabs: "Overview", "Information", "Pentests", "Users" (highlighted in blue), and "Assets".

6. Click "New User"

A blue button with a white plus sign and the text "New user".

7. Add user information. The Client will receive an email with an invite to the portal when you hit "Save". The new user will have a "Client" role in the system.

A form titled "New user" with a close button (X) in the top right corner. It has a tab labeled "User information". On the left, there is a placeholder for a user profile picture. To the right of the picture are input fields for "Name" and "Surname". Below these are input fields for "Email" and "Phone number". At the bottom, there are four checkboxes: "Request email activation" (checked), "Active" (checked), "Two-factor authentication enabled" (unchecked), and "Lockout enabled" (checked). At the bottom right, there are two buttons: "Cancel" and "Save" (with a save icon).

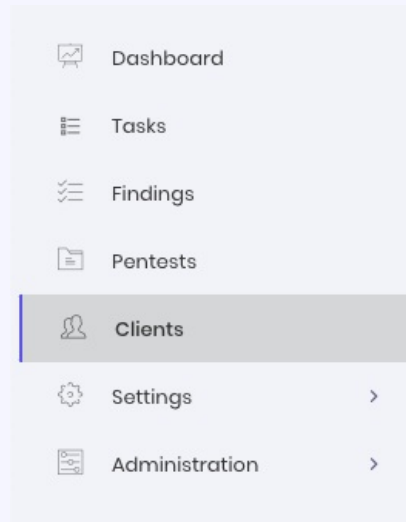

CLIENT INFORMATION

When you create a Client Account, you create a Username, customer number, and add any information that you like to the account. The Client cannot see the

Customer Number.

You can also choose to add information to the Client Account.

1. Click “Clients” in the left-hand menu

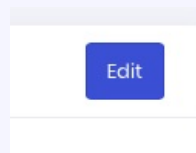

2. Click the Client you want to edit

Project Status				Search...	
Name	Client Number	Projects		Actions	
Demo Client	000000				

3. Select, “Information” on the Client Tab

4. Click “Edit”

You can set:

- Business Name
- Website
- Address
- Contacts (e.g., main, compliance, technical, etc.) These roles are important for notifications.

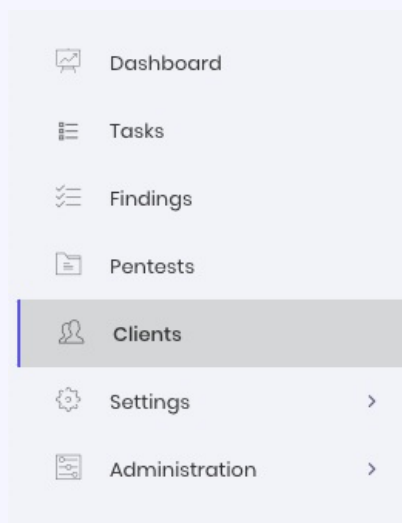

Once the client logs in, they can update this data at any time. They cannot update their client number.

Managing Clients

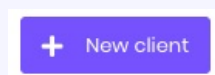

You can update, change an account, or cancel client projects at any time from an Admin account.

Create Client

- Click “Clients” on the left-hand menu

- Click “+ New Client” in the upper right corner

- Fill in the Client name and User number

New client

Name

Client Number
C-0003

Teams

Cancel Save

- Open the new Client from the list and edit any other details you'd like.

New user

User information

Name

Surname

Email

Phone number

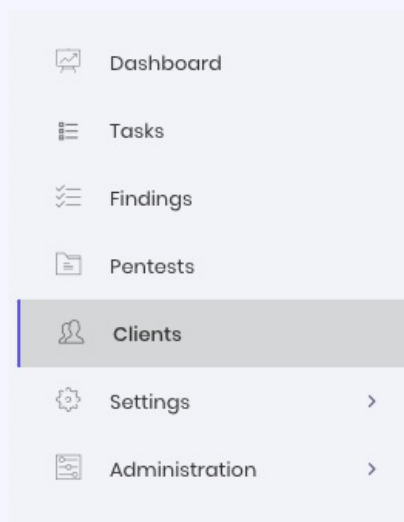

☒ Request email activation
☒ Active
☐ Two-factor authentication enabled
☒ Lockout enabled

Cancel Invite

Click [here](#) for more on setting up Client accounts.

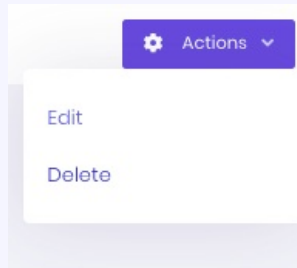

Delete Client:

- Click "Clients" on the left-hand menu

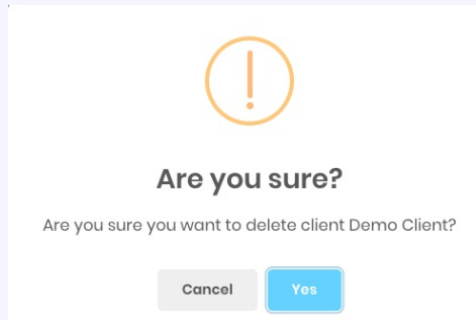

- Click on the Client you'd like to manage. Cyver Core offers a full search function, with username, name, and customer number supported
- Click "Action" in the top right, and

select "Delete"

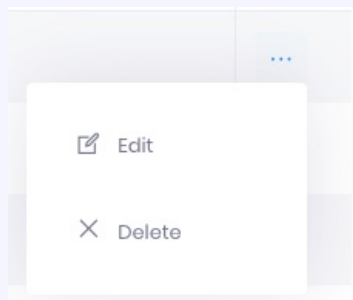

- One popup will confirm this deletion.
You cannot recover this data

Edit Client Username or Client Number

- Click "Clients" on the left-hand menu
- Click "..." on the right-hand side of the Client name

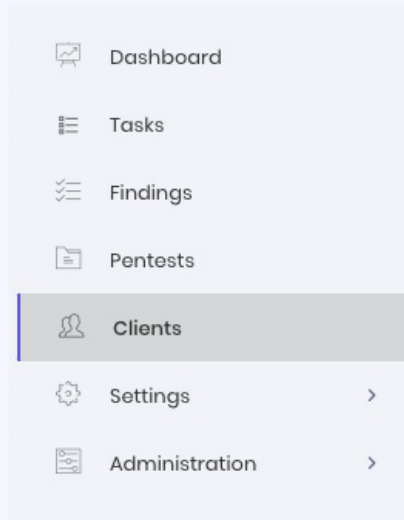

- Click "Edit"
- Update the Client Name and Client Number

A screenshot of a form titled 'Edit Client: client1'. The form has three input fields: 'Name' with the value 'client1', 'Client Number' with the value 'C-0001', and 'Teams' which is empty. At the bottom right, there are two buttons: a grey 'Cancel' button and a blue 'Save' button with a lock icon.

Edit Client Data and Contacts

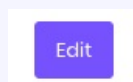

- Click “Clients” on the left-hand menu

- Click on the Client you’d like to manage. Cyver Core offers a full search function, with username, name, and customer number supported
- Click “Information”

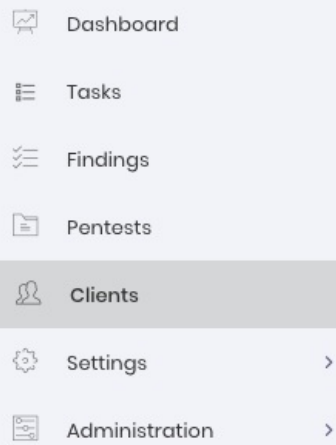

- Click “Edit” in the left-hand corner of the client tab

- Update data. Importantly, the Client can update this information at will
- Click Save

Edit Client Users

- Click “Clients” on the left-hand menu

- Click on the Client you'd like to manage. Cyver Core offers a full search function, with username, name, and customer number supported
- Click "Users" in the Client Tab

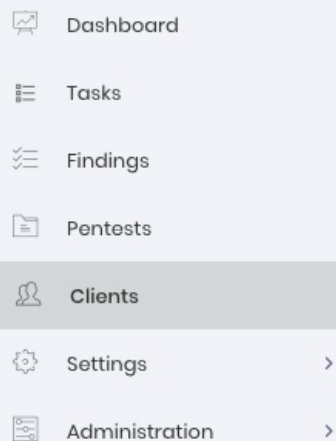

- Click "+ New User"

- Add data. The User will receive an email address with a platform invite
- The User can update all their data. However, the User will remain linked to the Client

Deactivate Users

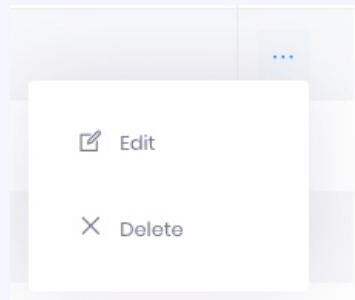

- Click "Clients" on the left-hand menu

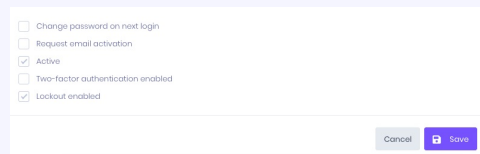

- Click on the client you'd like to manage. Cyver Core offers a full search function, with username, name, and customer number supported
- Click "Users" in the Client Tab

- Click "... " on the User you want to edit

- Uncheck "Active" on the User Popup

A screenshot of a user settings popup. It contains a list of checkboxes: "Change password on next login", "Request email activation", "Active", "Two-factor authentication enabled", and "Lockout enabled". The "Active" checkbox is currently checked. At the bottom right, there are "Cancel" and "Save" buttons.

- Click "Save"
