

Clients can be managed from the Cyver Core Client dashboard and from the Client's menu. You can edit permissions, information, logos, and other details at any time.

[If you're looking for how to onboard clients to the Cyver Portal, click here.](#)

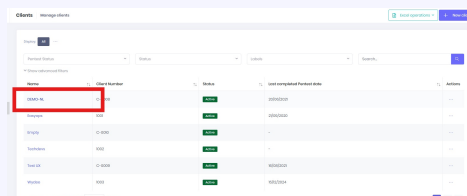

EDIT CLIENT INFORMATION

You can also choose to add information to the Client Account.

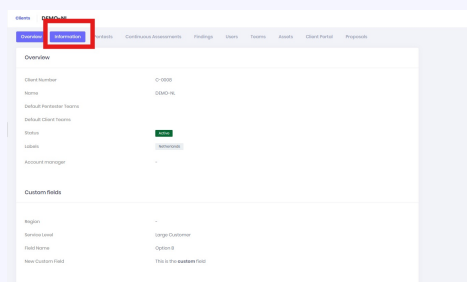

1. Click **Clients** in the menu

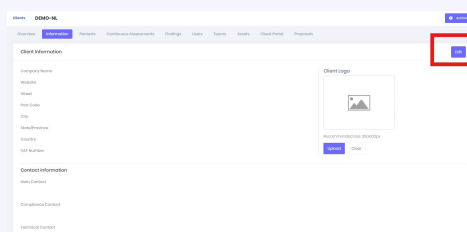

2. Select the Client you want to edit

3. Select **Information** from the Client Menu

4. Click **Edit**

You can set:

- Business Name
- Website
- Address
- VAT/Tax number
- Client Logo

EDIT COMPANY CONTACTS

Company contacts are used to determine who receives notifications, who's responsible for receiving proposals, etc.

From the edit menu, select:

- Main Contact / Account Owner
- Compliance Contact (receives compliance notifications)
- Technical Contact
- Financial Contact (receives invoice and billing notifications)

Depending on settings, the client can update this data at any time. They cannot update their Client Number.

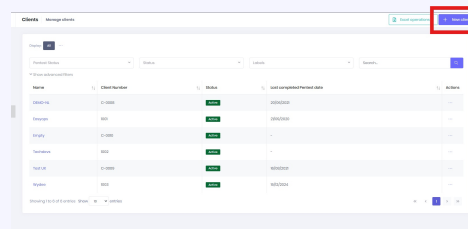

Don't forget to **save**!

MANAGING CLIENTS

You can update, change an account, or cancel client projects at any time from an Admin account.

CREATE CLIENT

1. Click + New Client

2. Fill in the Client name and User number

The screenshot shows the 'New client' form with two tabs: 'Basic' and 'Custom fields'. The 'Basic' tab is active. The 'Name*' field is empty and has a red asterisk icon to its right. The 'Client Number*' field contains the text 'C-003' and also has a red asterisk icon to its right. A red rectangle highlights both the 'Name*' and 'Client Number*' fields. Below these fields are 'Status' (set to 'Active'), 'Labels' (empty), 'Default Pen Tester Teams' (a 'Select' dropdown), and 'Account manager' (a dropdown menu). At the bottom right are 'Cancel' and 'Save' buttons.

3. Set status. You can have New, Active, or Inactive

This screenshot shows the 'New client' form with the 'Status' dropdown menu set to 'New'. A red rectangle highlights the 'Status' field. The 'Name*' and 'Client Number*' fields remain empty and highlighted with red asterisks. The 'Labels' field is still empty. The 'Default Pen Tester Teams' and 'Account manager' sections are visible at the bottom. 'Cancel' and 'Save' buttons are at the bottom right.

4. Add labels to more easily search and filter this client

This screenshot shows the 'New client' form with the 'Labels' text input field highlighted by a red rectangle. The 'Status' dropdown is still set to 'New'. The 'Name*' and 'Client Number*' fields are empty with red asterisks. The 'Default Pen Tester Teams' and 'Account manager' sections are visible at the bottom. 'Cancel' and 'Save' buttons are at the bottom right.

5. Assign a default team to work on this client's projects

The screenshot shows the 'New client' form with the 'Basic' tab selected. The 'Default Pentester Teams' field is highlighted with a red box. Below it, there is a 'Select' button and a link that says 'Assign a default team to work on this client's projects. [Learn more.](#)'

6. Assign an account manager to manage this client, their pentest requests, and billing if you're using the Quote add-on.

The screenshot shows the 'New client' form with the 'Basic' tab selected. The 'Account manager' field is highlighted with a red box. Below it, there is a 'Select' button and a link that says 'Assign a default team to work on this client's projects. [Learn more.](#)'

7. Click **Custom Fields** in the menu to add any custom fields you have already set up

The screenshot shows the 'New client' form with the 'Custom fields' tab selected. The 'Custom fields' tab is highlighted with a red box. Below it, there is a 'Field Name' dropdown menu and a 'New Custom Field' section with a rich text editor.

8. Click **Save** and confirm your choice

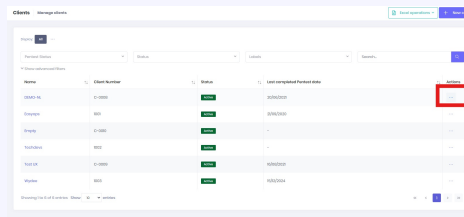

Open the new Client from the list and edit any other details you'd like.

[Click here for more on setting up Client accounts.](#)

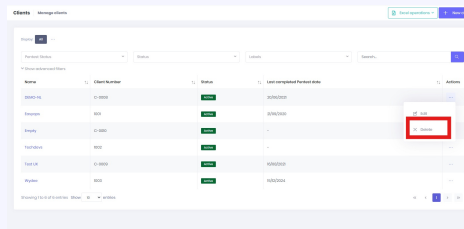

DELETE CLIENT:

From the Client dashboard:

1. Select ... from the Actions column

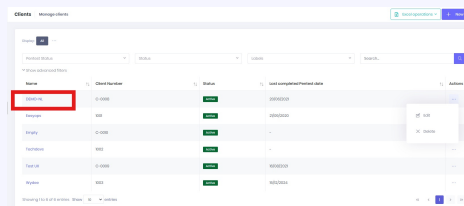

2. Click **Delete**

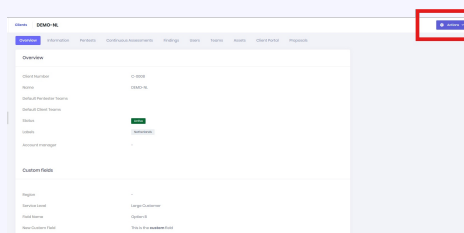

3. Confirm your choice. This cannot be undone

From the Client Menu

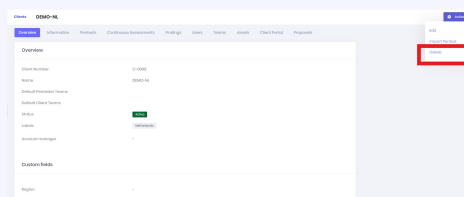

1. Select the client you'd like to delete

2. Click **Actions**

3. Click **Delete**

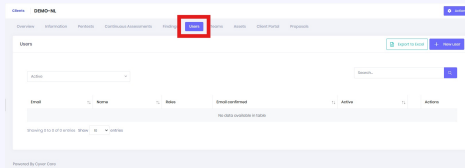

4. Confirm your choice. This cannot be undone

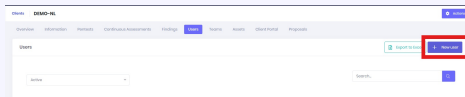

EDIT CLIENT USERS

Start by selecting the client you'd like to update

1. Click **Users** in the client menu

2. Click **+ New User**

3. Add data. You can set name, email, roles, function, contact information, activation settings, and immediately add the contact to a team.

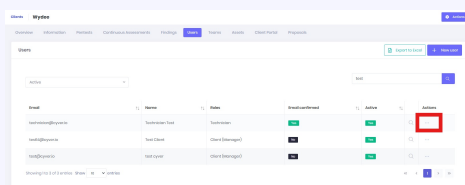

A screenshot of the 'New user' form. It has two tabs: 'User information' and 'Teams'. The 'User information' tab is active. It contains fields for Name*, Surname*, Email*, Roles (a dropdown menu), Function, and Phone number. There are also checkboxes for 'Request email activation', 'Active', and 'Lockout enabled'. At the bottom, there are 'Cancel' and 'Invite' buttons.

4. The user can update their data at any time. However, the user will always be linked to this client.

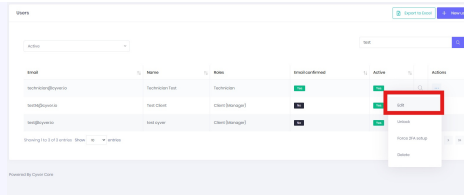

DEACTIVATE USERS

Go to the User tab on the Client menu:

1. Click ... under the Actions column

2. Select **Edit**

3. Uncheck **Active**

Edit user: Technician Test

User information | **Teams**

Name*
Technician

Surname*
Test

Email *
technician@cyver.io

Roles
Technician

Function

Phone number

☐ Change password on next login

☐ Email activation

☒ **Active**

☒ Lockout enabled

Cancel **Save**

4. Click **Save**

Deactivating a user means they cannot log into their account and will not be able to view or access the Cyver portal.

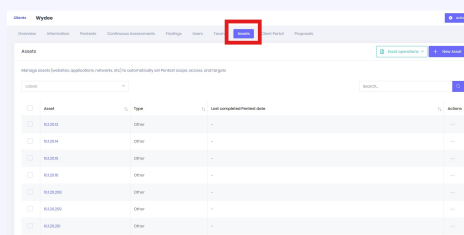

ADD AND EDIT CLIENT TEAMS

You can add, edit, and manage client teams to control notifications, work assignments, and asset ownership. [Learn more here.](#)

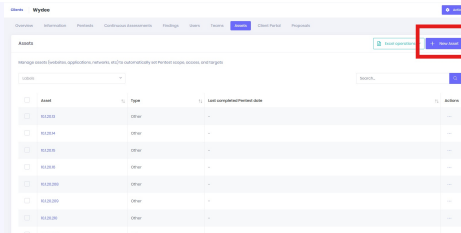

ADD CLIENT ASSETS

Go to the relevant client from the Client menu. Then:

1. Select **Assets** from the Client menu

2. Click **+ New Asset**

3. Add a searchable title and description

4. Add relevant details:

- Asset type
- URL/Environment/Repository
- IP/Location/Commit
- Port
- Host Name
- Vendor
- product
- Version
- Technology
- Pentesting Frequency
- Labels (For internal search and filtering)

6. Save

Clients can add or update their Assets at any time.

UPDATE CLIENT PORTAL SETTINGS

You can update the client portal settings at any time. [Learn how here.](#)
