

Pentest Checklists help you standardize your testing methodologies. Because checklists are often linked to Control Groups, we recommend creating your Control Groups before setting up your Pentest Checklists.

You can find and manage your checklist templates by navigating to the left-hand menu and clicking **Settings > Checklists**.

Checklists follow a simple three-tier hierarchy:

- **Checklist:** The main framework (e.g., *OWASP ASVS 4.0 L3*).
- **Task Group:** A specific category within the framework (e.g., *Security Verification Requirements*).
- **Task:** The individual action item (e.g., *Verify cryptographic keys and certificates are unique to each device*).

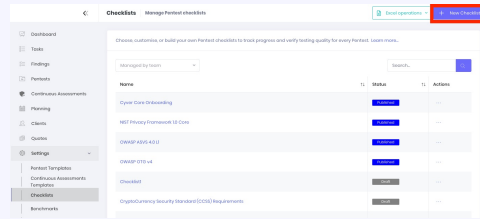

CREATING AND CONFIGURING CHECKLIST TEMPLATES

You can build and customize your own checklist templates directly from the settings menu.

CREATE A NEW CHECKLIST

1. Navigate to **Settings > Checklists**.

2. Click the **+ New Checklist** button.

3. Complete the fields: Name, Description, Status, External References, and Managed by team.

A screenshot of the 'New Checklist' form. It includes a 'Name*' field, a 'Description' field with a rich text editor, a 'Status' dropdown menu (currently set to 'Draft'), an 'External References' field, and a 'Managed by team' dropdown menu (currently set to 'Select'). At the bottom right, there are 'Cancel' and 'Save' buttons.

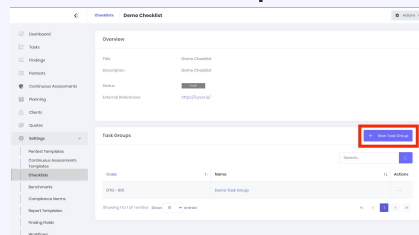

4. Click **Save**.

ADD TASK GROUPS

Task Groups help organize your checklist into logical sections.

1. Click on your newly created Checklist.

2. Click **+ New Task Group**.

3. Enter a Code, Name, and Description.

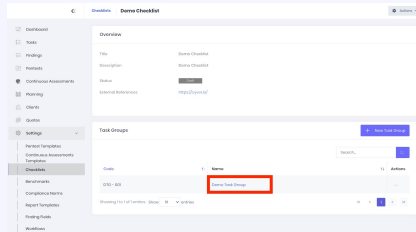

A screenshot of the 'New Task Group' form. It includes a 'Code*' field, a 'Name*' field, and a 'Description' field with a rich text editor. At the bottom right, there are 'Cancel' and 'Save' buttons.

4. Click **Save**.

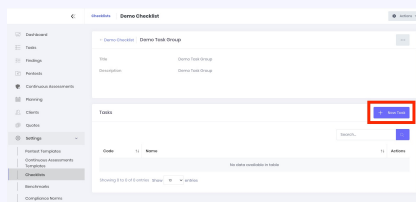

ADD TASKS

Tasks are the specific action items that pentesters will execute.

1. Click on the Task Group you just created.

2. Click **+ New Task**.

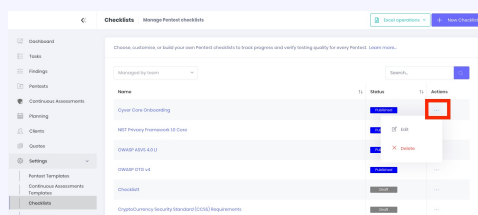

3. Enter the task's Code, Name, Description, and any relevant External References.

4. Click **Save**.

EDIT OR DELETE A CHECKLIST

To modify or remove an existing checklist, click the three dots (**...**) on the far right of the checklist row and select either **Edit** or **Delete**.

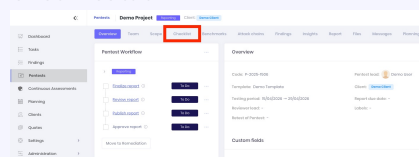

MANAGING CHECKLISTS IN A PROJECT

You can manage task assignments and track their progress directly from the project's **Checklist** tab.

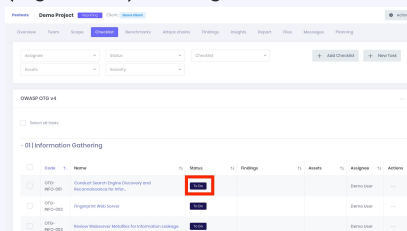

UPDATING TASK STATUS

You can quickly update the progress of any checklist task without opening a separate menu:

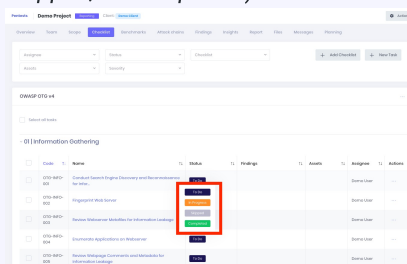

1. Navigate to your project and open the **Checklist** tab.

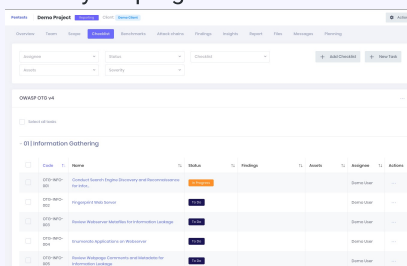

2. Locate the task you are working on.
3. Click directly on the **Status badge** (e.g., *To Do*) in the grid.

4. Select the new status from the dropdown menu (*To Do*, *In Progress*, *Skipped*, or *Completed*).

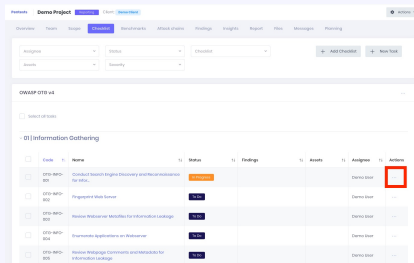

The badge will instantly update to reflect your progress.

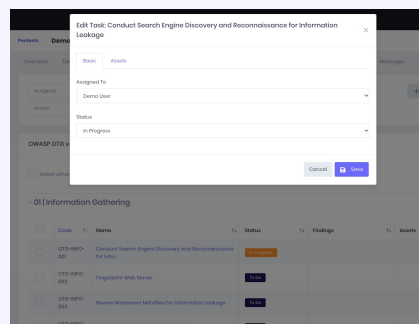

EDITING INDIVIDUAL TASKS

If you need to change the assignee or edit task details:

1. Click the three dots () in the **Actions** column next to the task and select **Edit**. (Alternatively, click directly on the Task Name).

2. In the modal, you can update the **Assigned To** field, change the **Status**, and link **Assets**. See [Linking Assets to Checklist Tasks](#) for more information.

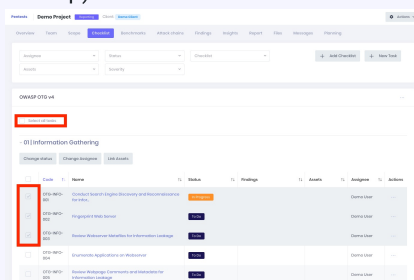

3. Click **Save**.

BULK ACTIONS FOR TASKS

To speed up your workflow, you can update multiple tasks at once using bulk actions:

1. Use the checkboxes on the left side of the grid to select multiple tasks (or click the **Select all tasks** checkbox at the top).

2. An action bar will appear above the task list with the following options:

- [illegible]
