

You can manually create a Finding for any Pentest.

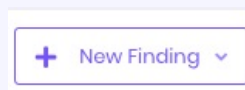

- Go to Pentests in the left-hand menu

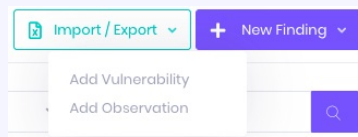

- Click on the relevant Pentest
- Move to the Findings Menu in the Pentest Dashboard

- Click "+ New Finding"

- Choose Vulnerability or Observation

- Set the Finding Code

New Finding

Basic | Classification | Recommendations | Checklist and Compliance | Evidence Instances

Type: Vulnerability

Code: F-2020-000

Name:

Status: Draft

Note: Draft is not visible to clients, other status will be

Assets:

Assets affected by this finding:

Description:

B I H

- Name the Finding
- Assign a Status (Draft is Default)
- Assign Assets from the system
- Add a Description
- Add a Link
- Rate CWE and CVE

Basic | Classification | Recommendations | Checklist and Compliance | Evidence Instances

Severity: Info

Impact:

Likelihood:

CVSS: 0.0

Score: vector

Weakness (CWE):

Select one or more related CWEs (if applicable)

Known Vulnerability (CVE):

Select one or more related CVEs (if applicable)

- Set Criticality and Risk Information
- Write out Background Information. Description support [Markdown](#)
- Write out Recommendations

Basic | Classification | Recommendations | Checklist and Compliance | Evidence Instances

Background Information:

B I H

Recommendations:

B I H

- Link the Finding to Tasks and Control Groups
- Add Instances

The Finding will not be visible to the Client until you change the Status to "Pending Fix"

**Your Pentest Report Template may exclude some Types of Findings. For example, you may chose to exclude "observations" from a Report. However, you can still push them as Findings to the client.*
