

Contacts include stakeholders and important people who should receive alerts and updates regarding cybersecurity and audit results. Contacts can be updated under “Settings”.

To add contacts, they must already be in the Cyver Core system as users. [Click here to learn how to add Users to your company.](#)

Click “Settings” in the left-hand menu

Click “Company Info”

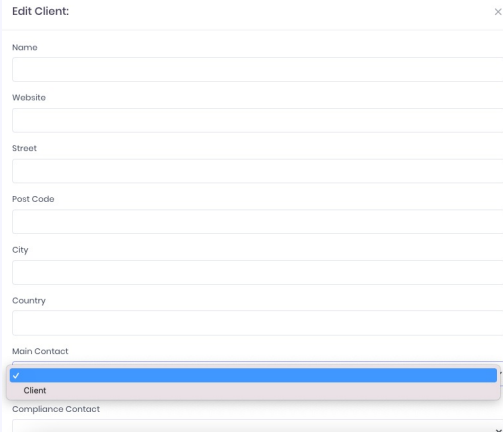

Select the “Edit” button from the mid-right

A form for editing contact information. It has a header bar with a search icon and a 'K' button. Below the header, there are input fields for Name, Website, Street, Post Code, City, and Country.

Cyver Core currently offers 4 primary contacts:

- **Main** – This is the administrator and should be the project owner, responsible for confirming and approving new projects
- **Compliance** – Your compliance officer
- **Technical** – A project owner or lead developer
- **Finance** – The person responsible for approving budgets for new projects

The screenshot shows a web form titled "Edit Client:" with a close button (X) in the top right corner. The form contains several input fields: "Name", "Website", "Street", "Post Code", "City", and "Country". Below these fields is a "Main Contact" dropdown menu, which is currently open and shows "Client" as the selected option. At the bottom of the form is a "Compliance Contact" dropdown menu, which is currently closed.

Contacts will receive updates when projects change status, at important stages, and during approval. [Click here to complete the final stage of account setup, adding Assets.](#)
