

Finding Status is used to manage remediation and retesting flows, so your developers can collaborate with the Pentester to solve problems.

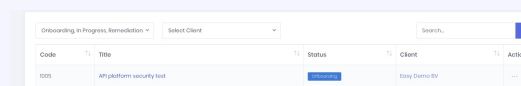

- **Pending Fix** – Findings are delivered under this status. Your Developers have not yet remediated the issue
- **Fixed** – Your developers mark the Finding as Remediated and do not request a retest
- **Ready Retest** – Your developers mark the Finding as Remediated and request a retest
- **Accepted** – Your developers mark the Finding as an Accepted Risk, necessary for your Asset to function

TO UPDATE FINDING STATUS:

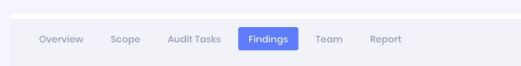

1. Click “Pentests” on the left-hand menu

2. Select the Pentest you want to view

3. Click “Findings” in the Pentest Tab

4. Click the Finding you want to update

002	Terminal Services Use SSL/TLS	Vulnerability	Green	Yellow	...
-----	-------------------------------	---------------	-------	--------	-----

5. Scroll to the bottom and select the appropriate Status from the dropdown menu.
