

Cyver Core makes it easier to communicate and collaborate with Pentesters using secure chat, complete with file upload functionality. All file uploads are encrypted making it easy to discuss vulnerabilities in a secure environment.

1. Click "Pentests" on the left-hand menu

2. Select the Pentests you want to view

3. Click "Findings" in the Pentests Tab

4. Click the Finding you want to update

5. Scroll to the bottom and use the comment box

6. Click “Add Attachment” to share proof of finding, screenshots, or other data

7. Update “Status” if relevant

8. Click “Submit”

Persons assigned under “Team” will receive comment notifications
