

Clients will normally upload their own assets. In some cases, you might have to do so for them or may want to edit or update Assets.

1. Click "Clients" on the left-hand menu

2. Click on the client you'd like to manage. Cyver Core offers a full search function, with username, name, and customer number supported

3. Click "Assets" in the Client Tab

4. Click "+ New Asset"

5. Add a Title. This should be searchable

Create New Asset ✕

Title

Description

Domain

IP

Add a single IP or an IP range, e.g. 192.168.0.0-192.168.0.255

6. Describe the Asset

7. Add Information and Categorization

Categorize the Asset (Cyver Core currently supports asset types including Website, Web Application, Mobile Application, API, Cloud Infrastructure, On-Premise Infrastructure, and Other)

Type

- ✓ Website
- Web Application
- Mobile Application
- API
- Network
- Wifi Network
- Other
