

You can easily import assets in bulk from an Excel file.

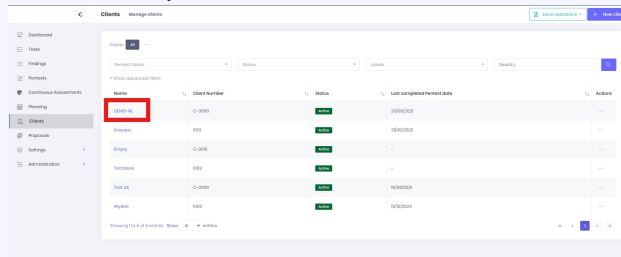

To do so, prepare your Excel file using the sample file located under Excel Operations on the specific client's Asset tab.

HOW TO IMPORT ASSETS FROM AN EXCEL FILE

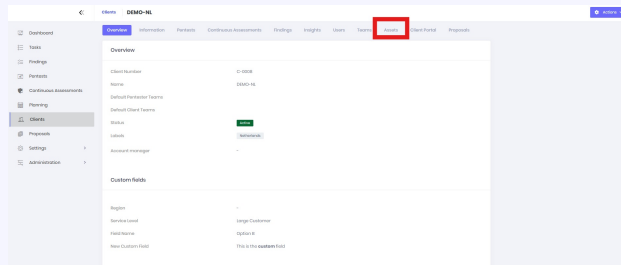

1. Click **Client** from the menu

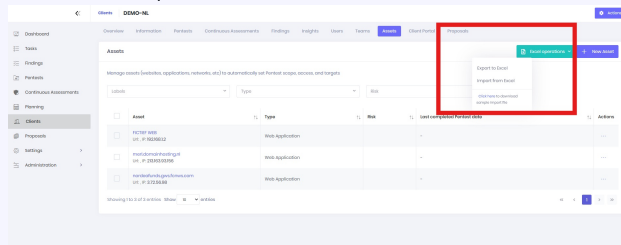

2. Select the **Client** you'd like to edit

3. Go to the **Assets** tab

4. Click **Excel Operations** and Select **Import from Excel**. You can also download a sample file [here](#).

5. **Upload** your file. Your assets will automatically import.
